Energize Ohio: Building Ohio’s Energy Future

Purpose
Energize Ohio is a multidisciplinary program that addresses a wide range of energy education topics including shale energy, renewable energy, energy policy, on-farm energy, youth education, landowner leasing, and sustainable community planning. The curriculum consists of worksheets, presentation materials, workshop materials, bulletins, fact sheets, marketing templates, and evaluation tools. The ultimate goal of Energize Ohio is to enhance community leaders’ and local residents’ knowledge of energy drivers and development in order to promote informed decision-making and best practices.

Impact
In 2013, OSU Extension taught more than 500 Ohioans how to prepare for, attract, and develop potential renewable energy projects.

In 2013, OSU Extension and the OSU Subsurface Energy Resource Center (SERC) combined to deliver 35 programs, reaching 2,334 people, on shale energy-related topics.

In 2013, Energize Ohio team members were very active in forging partnerships, developing, and submitting funding proposals. In total, five proposals were funded, committing roughly $345,240 to support renewable and shale energy research, outreach, and education.
