The Initiative for Food and AgriCultural Transformation, InFACT

Purpose
InFACT’s vision is to use OSU’s campuses and lands as living laboratories to create new conceptual, physical and social models of food systems that promote human health while balancing technology, ecological capacities, economics, justice and equity.

This requires collaboration and balance across the sciences, engineering, and humanities, and with many partners including students, Ohioans, business and industry, and policy makers seeking holistic approaches to improved agroecosystem and human health.

Impact
We’re engaged in scholarship, education and service that will help reduce the percentage of Ohio households experiencing low food security.

We’re connecting agroecosystem health with the health of human inhabitants, through food.

We’re changing the culture of The Ohio State University, bringing the entire university to bear on one of the great challenges of our time.

Ohio State Colleges/Units Involved
Almost all colleges, dozens of departments, schools and interdisciplinary programs. Over 100 faculty, staff and students are pulling together to address Food and AgriCultural Transformation!

Community Partners Involved
Existing collaborations are many, new collaborations are sought, please get in touch!

How you can get involved:
• Follow up on the commitment you’ve made today to get involved in food security, equity and food justice work in your own community.
• Support the many organizations working to make a difference in food security.
• Collaborate with our many faculty and student teams.
• Donate to support program funding.
• Stay in touch with what’s happening in food security and InFACT (go to discovery.osu.edu/infact).
