

# Service Learning to Instill Sustainable Business Practices

## Purpose

Ohio State partnered with Hexion, Inc. to develop a hands-on course in which students in the EEDS (Environmental, Economy, and Development & Sustainability) major could have the experience to develop strategic responses to authentic business challenges.

## Impact

Over a 3-year period approximately 150 students have performed strategic materiality assessments which have strengthened the sustainability component of Hexion's marketplace strategy.

Five EEDS students have successfully competed with national pools of candidates for internships and/or full time employment at Hexion.

Hexion has continued to expand its relationship with OSU and has engaged other course instructors and student organizations to provide additional service learning opportunities.

## Ohio State Colleges/Units Involved

Fisher College of Business  
School of Environment and Natural Resources  
Department of Agricultural, Environmental and Development Economics

## Community Partners Involved

Hexion, Inc.

## How you can get involved:

- Students can take the 2-course sequence BA3640.02/BA3642.02
