

The BRIDGE: Solve a Complex Issue While Developing Employability Skills

Purpose

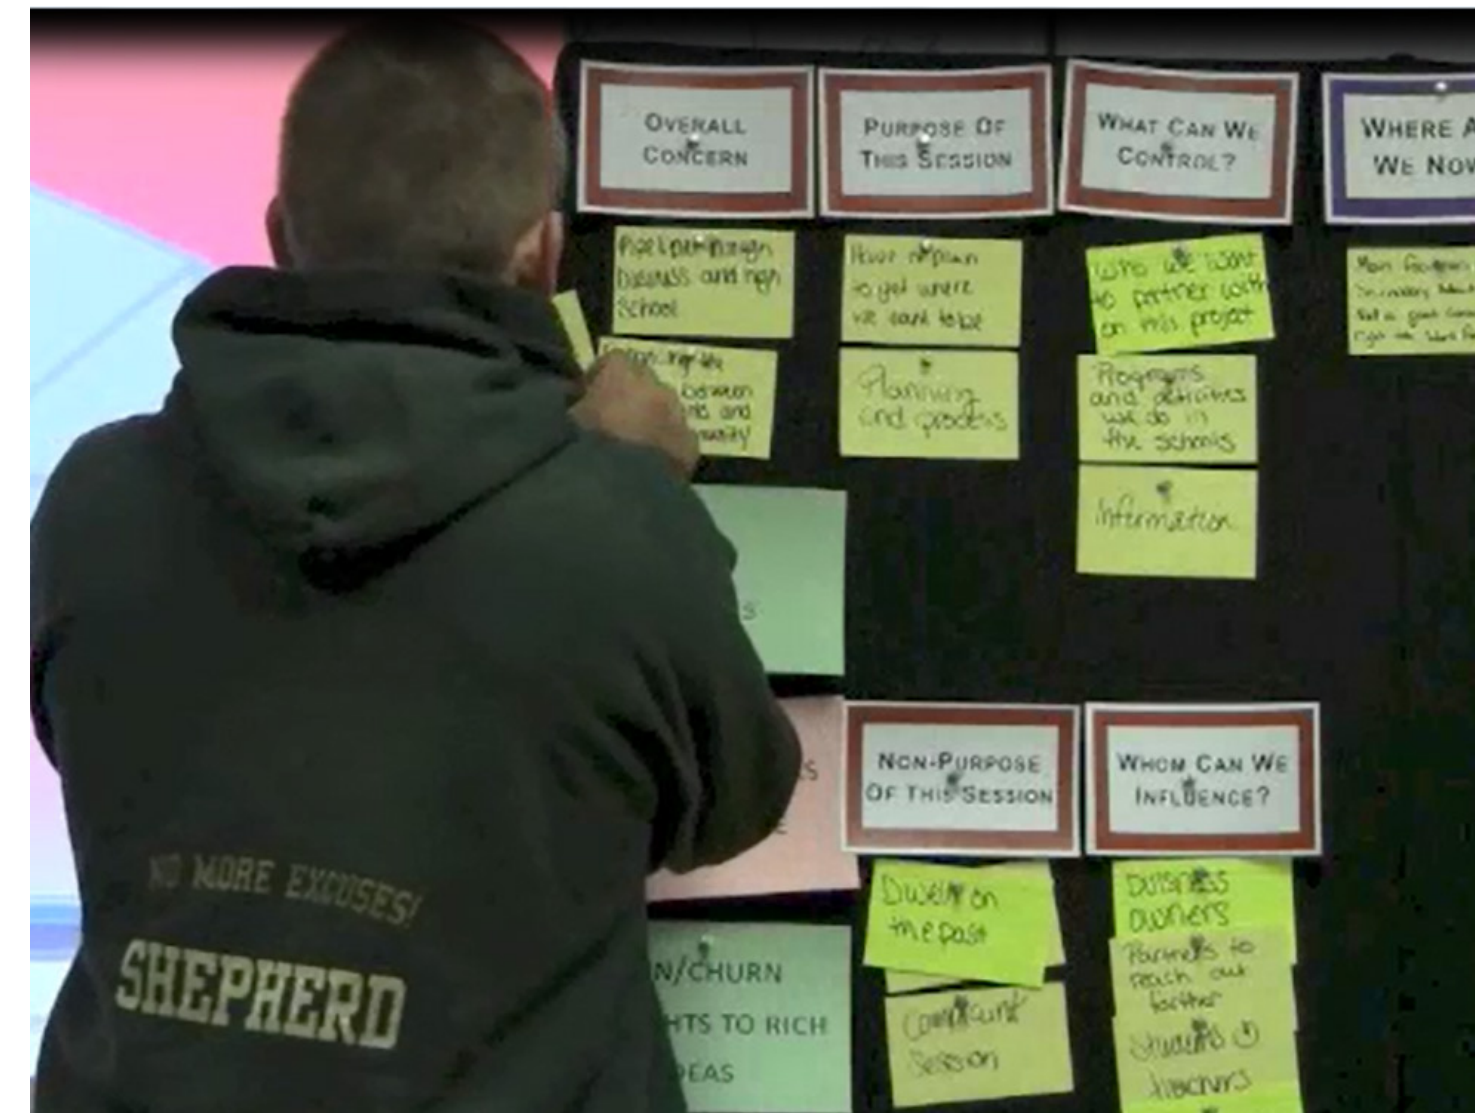

Empowering students to develop analytical skills that are critical for today's workforce is the overarching theme of this Alber Enterprise Center program. By using common business analysis tools in a logical 6-step sequence, students learn how to solve complex issues while gaining valuable experience in critical thinking, problem solving, team building, decision making, leadership, and project planning.

Impact

Solve a complex issue that has many components in which changes to one could cause major consequences to others.

Cultivate team skills: all team members participate in brainstorming ideas and developing a comprehensive implementation plan.

Develop transferable abilities to become more sought-after by employers.

Ohio State Colleges/Units Involved

Alber Enterprise Center
Ohio State University Extension 4-H

Community Partners Involved

FFA
Ridgemon High School
Marion City Harding High School

How you can get involved:

- Register for BRIDGE facilitator training June 14-16, 2016
